

DHAYU WIRAGUSTI

☎ 085888540701

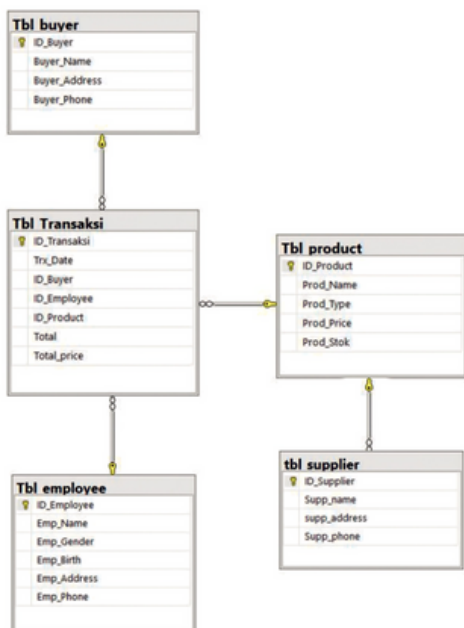

✉ dhayuwiragusti@gmail.com

📍 Cilangkap, East Jakarta, Indonesia

I'm an active student at CEP CCIT FT UNIVERSITY of INDONESIA majoring in Information Technology and Asia e University majoring in Information and Communication Technology, and I have the desire to develop myself through the internship program. With an educational background in Information Technology, I gained an understanding of data processing and several programming languages.

PROJECTS

Database Toko - SQL Server

[https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20\(4\).exe](https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20(4).exe)

The Database Project with the title 'Hola Cell', which was created in groups, is a description of the existing database in a shop. This database contains 5 tables, including the buyer table, transaction table, employee table, product table and supplier table.

Data Analyst - Ms. Excel

[https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20\(4\).exe](https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20(4).exe)

Create school data and analyze it using the features contained in MS. excel like if function, calculating average, and others including vlookup and pivot tables.

PROJECTS

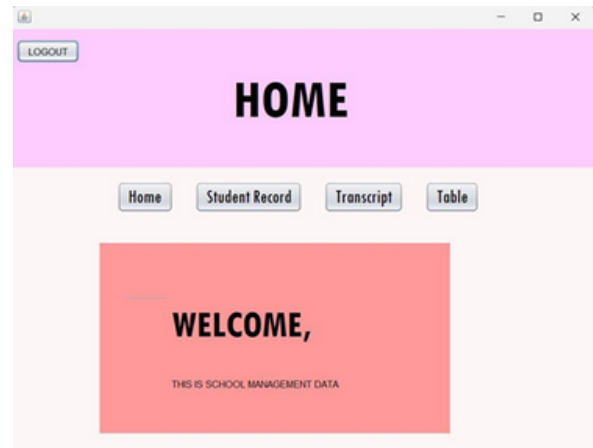

Coffee Shop - Visual Studio Code

[https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20\(4\).exe](https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20(4).exe)

The Coffee Shop web server was created when we were studying Ubuntu software. Here we created a Coffee Shop web server using Visual Studio code which was connected to Virtual Box and Ubuntu.

School Data app - Apache

[https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20\(4\).exe](https://github.com/Dhayuraa/Shop-Database/blob/main/SQL2022-SSEI-Dev%20(4).exe)

The school data management application was created using the Apache application and connected to the XAMPP database which functions to collect grades and pass or fail status.

WORK EXPERIENCE

Part Time - English Teacher

Mei 2023 - Now

Make monthly student progress reports, as well as help create a rundown of several major activities such as teachers' day, halal bihalal and the institution's anniversary.

Karang Taruna - Organization

July 2021 - Now

Make financial reports at every youth organization event and often act as host.

STUDIES

Asia e University

2022 - Now

Information Communication Technology

1. Computer Communication & Networking and Computer Security:

I have studied both courses that deal with technical aspects of data communication and system security.

2. Entrepreneurship & Ethics and Management Information System:

I have studied both courses that discuss management aspects and ethics in the implementation of information technology in organizations.

3. Object Oriented Programming and ICT Project Management:

I have studied both courses focusing on software development and project management in the context of information technology.

CEP - CCIT FTUI

2022 - Now

Technology of Information

1. Relational Database Design and Implementing Database Design on MS

SQL Server: I have studied relational database design concepts and their implementation using MS SQL Server

2. Object Oriented Programming and Object Oriented Programming

Project: I have studied the concepts of object-oriented programming and their application in projects.

3. Computer Network and Computer Network Design Project:

I have studied computer networks and designed computer networks in projects.

SKILLS

- SQL Server
- Database
- C++
- Internet of Things (IOT), Connecting Things and Networking

LANGUAGE

- Indonesia - Native
- English - Professional

CERTIFICATION

Cisco Networking Academy

Certificate of Course Completion

IoT Fundamentals: Connecting Things

For completing the Cisco Networking Academy® Connecting Things course, and demonstrating the ability to perform the following:

- Explain how IoT technologies are transforming Business and Society.
- Use sensors, actuators and micro-controllers (Arduino) to prototype an IoT solution.
- Use Python, Cisco PL-App and Raspberry Pi to prototype an IoT solution.
- Describe the role of Network and Fog Computing in an IoT solution.
- Describe how IoT Solutions can be used to digitise business applications or address social problems.
- Diagram a business model for a given business or social endeavour using the Business Model Canvas.

Cisco Networking Academy - IoT Fundamentals: Connecting Things

Cisco Networking Academy

Certificate of Course Completion

IoT Fundamentals: IoT Security

The student has successfully achieved student level credential for completing Cisco Networking Academy® IoT Security course administered by the undersigned instructor. The student was able to proficiently:

- Articulate specific security challenges related to the Internet of Things.
- Perform threat modeling activities on an IoT system at physical, communication and application layers.
- Use Kali Linux penetration testing tools to identify vulnerabilities in IoT systems.
- Apply threat modeling and risk assessment frameworks and recommend threat mitigation measures.
- Explain the impact of emerging technologies on IoT Security.

CERTIFICATION

Cisco Networking Academy

IoT Fundamentals: Big Data & Analytics

For completing the Cisco Networking Academy® Big Data & Analytics course, and demonstrating the ability to perform the following:

- Explain the value of data analytics for an IoT solution.
- Describe and Apply the data analysis process to solve a problem.
- Apply Python scripts to collect, prepare, analyze and visualize or export data.
- Apply basic machine learning algorithms.
- Apply data visualization and storytelling techniques to communicate results of analysis.
- Describe approaches to data management including SQL and No-SQL solutions.
- Explain the fundamental concepts behind the main Big Data platforms.

Cisco Networking Academy

IoT Fundamentals: Hackathon Playbook

For completing the Cisco Networking Academy® IoT Hackathon, and demonstrating the ability to perform the following:

- Empathize with users and get insights to solve a problem.
- Define a problem and brainstorm solutions.
- Create an IoT prototype.
- Create a Business Model Canvas.
- Present the solution to the judging panel and demo the prototypes.
